PUBLISHERS' NOTE

In 1832, the late George P. Putnam published, under the title of *The World's Progress*, a cyclopædia of facts and events that had been compiled by himself, and that had originated in notes taken as a guide for his own historical reading. The work was reprinted in successive editions during the ensuing forty years (that is to say up to the year of the author's death) and the entries were added to and expanded until the 300 pages of the original issue had developed into a portly volume of 1200 pages. A demand continuing through more than a third of a century may be accepted as evidence that the plan of *The World's Progress* and the material presented in it had been found of service by students of history and by readers generally. The cyclopædia portion of the compilation came, necessarily, to be superseded by works of reference of later origin, and *The World's Progress* was, therefore, allowed to go out of print. There continued, however, to be demand for the historical tables, the plan of which was original with Mr. Putnam, and since 1870 this division of the work has been issued with material corrections and additions in successive editions compiled under the editorial supervision of the son of the original editor.

In the edition now presented, while the scheme and arrangement of the original editor has been left unchanged, the entries have been carefully revised and in part rewritten, and the record has been brought down to date. The editors of this new edition have found it desirable to include a comprehensive alphabetical index of subjects, by means of which can be located promptly any event referred to in the body of the book.

The edition also includes a number of tables presenting the genealogies of the more important of the historic families of Europe, genealogies which make clear their family and dynastic relations to each other.

Under the scheme devised by Mr. Putnam (a scheme which made his volume practically unique), the events occurring throughout the world at the same period of time are recorded in parallel columns. This arrangement calls in the powerful assistance of visual association by showing at a glance simultaneous occurrences in different countries, which enables the memory to grasp and to retain a hold of the dates and the relations with each other of important events. It also helps to emphasize the lesson that the history of any one nation is only a part of the history of the world, and that the proper way to study history is to trace the relations with each other of the peoples scattered over the face of the globe.

As the wiser historians and instructors do not fail to emphasize, the precise date of an event is in itself a detail of minor importance, which has value chiefly in serving to trace its relations to other events and in undertaking the influence of one upon the other. The reader, for instance, who learns that in 1492, under the patronage of Queen Isabella of Spain, Columbus accomplished his historic voyage to the Western Hemisphere, may properly be interested in noting, by carrying his eye across the columns of two pages, what rulers were at that time in control of other European States, some one of whom might possibly have secured for his own realm the prestige of the great discovery. In like manner, it is essential for a right understanding of the Protestant Reformation of the sixteenth century, for the thoughtful reader to keep before him the personalities of the monarchs and of other leaders of men who were contemporary with Luther, with Leo X, and with the Emperor Charles V.

These Tabular Views, while invaluable in the practical work of historical instruction, will be found extremely useful by the general reader. The writer of these lines has for many years

kept the volume at his elbow as an indispensable reference in connection either with reading or with writing. The work was designed particularly for the many who appreciate the importance of having trustworthy historical information conveniently at hand but who have not within reach comprehensive histories or the time to go through these for the facts desired.

It has been the intention of the editor in the several instances in which events and dates have become a matter of controversy, to follow the authorities most generally accepted. It may easily, however, be the case that an occasional date or statement has been retained which some scholarly reader may find ground to question; such a critic can only be referred back to the latest investigators for the authoritative decision that seems to him to be important and that it is not practicable to attempt in a condensed summary of the world's history such as is presented in the present volume. The study of history and the intelligent reading of history should be, as stated, a study of the relations of events to each other made with the view of securing as far as practicable an understanding of the causation of these events and of the influence exercised upon them by historic characters, by the leaders of men. This is the information which the publishers are undertaking to present to the public, on both sides of the Atlantic, in *The Handbook of Universal History.*
